

## PESTICIDES

### **Pesticides hurt humans, wildlife, water & birds!**

The spreading and spraying of chemicals on lawns, trees and gardens is against the common right of all citizens to breathe clean air for good health.

Doctors say pesticides cause serious illnesses such as cancer, reproductive problems and neurological disorders. They found that children were especially vulnerable.

120+ Canadian municipalities have already protected their citizens from pesticides. Including Halifax and the entire Province of Quebec.

Ask your municipality to enact a bylaw on pesticides to protect air, water, wildlife and human health!

**Thank-you for using alternatives to pesticides!**
